Customer Problem Statement – Smart Home System

Problem Statement (PS-1)

I am a homeowner
I'm trying to manage and control my home devices efficiently
But I find it difficult to operate multiple devices separately
Because there is no centralized system to control everything
Which makes me feel frustrated and less productive

Problem Statement (PS-2)

I am a working professional
I'm trying to ensure the safety and security of my home while I am away
But I cannot monitor my home in real-time
Because traditional systems do not provide remote access and alerts
Which makes me feel worried and insecure

Problem Statement (PS-3)

I am a family member
I'm trying to reduce electricity usage and manage energy efficiently
But I don't have proper insights into energy consumption
Because there is no smart monitoring system
Which makes me feel concerned about high electricity bills

Problem Statement (PS-4)

I am an elderly person
I'm trying to control home appliances easily
But I find it difficult to manually operate switches and devices
Because of physical limitations and complex systems
Which makes me feel dependent on others

Conclusion

These problem statements highlight the need for a **Smart Home System** that provides:

- Centralized control of devices
- Remote access and monitoring
- Enhanced security features
- Energy management
- Ease of use for all users

This helps improve comfort, safety, and efficiency in daily life.
