Empathy Map Canvas – Smart Library System

An empathy map is a simple and easy-to-understand visual tool that captures user behaviors, thoughts, and feelings. It helps teams understand users better and design effective solutions based on real needs.

Creating an empathy map allows us to view the system from the user's perspective, including their goals, frustrations, and expectations.

User Type: Student

Says

- **"I need this book for my exam."**
- **"Is this book available now?"**
- **"I don't want to wait in long queues."**

Thinks

- **"I hope the book is available."**
- **"The system should be fast and easy to use."**
- **"I need quick access to study materials."**

Does

- **Searches for books in the system**
- **Checks availability status**
- **Requests or borrows books**

- **Returns books after usage**

Feels

- **Frustrated when books are unavailable**
- **Happy when the system is quick and easy**
- **Confused if the interface is complex**

User Type: Librarian

Says

- **“I need to manage all book records efficiently.”**
- **“Tracking issued books should be easy.”**
- **“I want to reduce manual work.”**

Thinks

- **“The system should be accurate and reliable.”**
- **“I must keep records updated.”**
- **“Managing many students should be simple.”**

Does

- **Adds and updates book records**
- **Issues and receives books**
- **Tracks overdue books**
- **Generates reports**

Feels

- **Overwhelmed with manual work**
- **Relieved when tasks are automated**
- **Satisfied when system works efficiently**

Conclusion

The empathy map helps in understanding both students and librarians. It ensures the Smart Library system is designed to be user-friendly, efficient, and focused on solving real problems faced by users.
